

HURRICANE VARIPITCH

DATE: 29 January 1999 REVISED: 4 February 2005

DIMENSIONS:

MODEL	H (mm)	ØD (mm)	Suit Roof Pitch	Weight (kg)
H100	110	103.5	0° - 45°	0.07
H150	130	152	0° - 45°	0.11
H300	190	305	0° - 45°	0.42
H400	250	405	0° - 45°	0.72
H450	290	457.5	0° - 45°	0.92
H500	315	506.5	0° - 45°	1.37
H600	340	597.5	0° - 45°	1.69
H700	340	699	0° - 22.5°	2.44
H800	365	795	0° - 22.5°	2.97
H900	390	895	0° - 22.5°	3.57

Tolerances: Size +/- 2mm
Weight +/- 0.02kg

NOTE

The Varipitch fits inside the throat of the Hurricane ventilator. Therefore the effective total height of the Varipitch is reduced by the overlap of the Hurricane throat. This overlap can vary from 50-110mm. Revolving the Varipitch to suit a roof slope also reduces its height.

SPECIFICATIONS:

MATERIAL: Aluminium 5005 H34
